In response to applicant's amendment dated May 17, 2004, the following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ishii et al (5245599).

The reference shows an optical disk reading apparatus comprising an error signal extractor (read error, focusing error, tracking error...etc) fig 3 elements 18, 19, and element 4 outputting tracking and focusing error signals, an equalizer including phase compensator 11, a dropout extractor for extracting an error in the envelop signal 15, 18 and 19 and a controller 20 to change the equalizer characteristics based on the extracted error.

Claims 2, 3, and 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 4817073.
